2024 Bulb & Seed Exchange

The **current Exchange** is the **November Seed and Bulb Exchange 2024** and the **list of available material** has not yet been released.

- **List of bulbs and seeds available until 30th August 2024**

Corrections

- Bert Zaalberg reports that the bulbs listed as *Gethyllis gerardii* are almost certainly *Gethyllis gregoriana*. He wrote that "Since *gerardii* is an unpublished species name, I tried to get more info through Paul Cumbleton to find out its proper name. Paul told me that he purchased them in 2006/2007 as *G. gerardii* from Gordon Summerfield. Location info was Nardouwsberg, Clanwilliam. After having seen pictures of flowers and leaves, I'm pretty certain this is *Gethyllis gregoriana*. Leaves are quite diagnostic for this species and match the description Paul gave me. I assume it was a simple typo from Gordon back then, since *gregoriana* was cultivated by Gordon Summerfield in those days." (Thanks, Bert!)

More information

Jon Evans reports that the Southern African Bulb Group will be running its Annual Bulb and Seed Exchange again this year.

Below is an abridged version of his announcement, including the timetable – read the full version which includes more instructions for participants and a description of difficulties in exchanging material with overseas members. *Note: for some unknown reason, some web browsers may display this file as a blank sheet, even though the file is correct. If this happens to you, please try a different browser, or download the file and open it in a PDF viewer such as Adobe Acrobat, or refer to Bulletin 50/2 emailed to members on 19th June.*

We are planning to run the exchange on the same timing as recent seasons, so material is sent out in early September, and can be planted and started into growth in a timely fashion. There will be a further exchange later in the year for autumn ripening seed etc.

This Exchange is a key part of our activities, so we are hoping as many of you as possible will provide your spare bulb or seed material for the benefit of other members! Please note that although we call it an exchange, if you don't yourself have material to offer, you will still be able to request seeds or bulbs from the list in exchange for a suitable donation to cover at least the cost of postage and packing.

The timetable this year is as follows:

- If you have bulbs or seeds available, please post them to Jon Evans, 46 Upper Way, Farnham, Surrey, GU9 8RF, UK, to arrive by Wednesday **14th August**. Please try to clean the donations as well as you can – if you don't, I have to. Please store them in paper bags if possible (items

stored in plastic bags can sweat and rot). And please seal them carefully – Newsletter 36 contained instructions for making seed envelopes out of sheets of blank paper. Please include a list of your donations, … If you can send the list by email that would be brilliant.

- If you expect to have items available later, by the end of August, please send me a list of your intended donations, with any supporting information, by email or post, to arrive by Wednesday **14th August**. My email address is jonevans46.uw@btinternet.com. Please send any such donations to me by Wednesday **28th August** at the latest.
- I will then prepare the Bulb and Seed Exchange list of available material which I will email out to Members by Friday **16th August**. Should you require a **paper list** to be sent to you by post, before this date **please send me a self-addressed envelope** suitable for five to ten folded sheets of A4 paper (with the correct postage attached if you live in the UK).
- After you have received the Bulb and Seed Exchange list of available material, please send your wishlist to me, to arrive by Friday **30th August**. I will then start the despatch process. I expect all orders to be sent out by Monday 9th September.
- Then it's up to you to grow the plants and enjoy them!

I hope you find this exercise valuable and perhaps obtain some new plants. Of course, its success depends on the generous efforts of the donors, so please check whether you have some spares you can donate.

– *Jon Evans*

General information on our exchanges

Bulbs and seeds from the summer exchanges are sent out in early September, and can be planted and started into growth in a timely fashion. Seeds from the autumn "ephemeral" exchanges are sent out in late November, to be sown immediately.

Jon Evans, who does all the work, says "*This Exchange is now a key part of our activities, so we are hoping for many of you to provide your spare bulb or seed material for the benefit of other members! … I am hoping that many of you will have had more time to spend in your garden collecting seeds, and will have a chance to get the summer repotting done nice and early. Please note that although we call it an exchange, if you don't yourself have material to offer, you will still be able to request seeds or bulbs from the list in exchange for a suitable donation to cover at least the cost of postage and packing. The page on Payments provides some information on ways to pay.*"

Overseas Members

I would like to clarify our policy regarding sending items to overseas members. We are only able to send material to overseas members in ways complying with their government's regulations (i.e. no mis-labelling of contents etc), and only when conforming with those regulations is neither too onerous, nor expensive (e.g. we cannot issue phytosanitary certificates etc). We expect the relevant member to be able to guide us in following their government's requirements. Although we'll do our best to comply with the regulations where possible, we cannot be held responsible for any bulbs or seeds which are confiscated.

All **donations from all overseas members** must now, sadly, be accompanied by a Phytosanitary Certificate. We recognise that this makes it difficult or impossible for these members to donate to the exchange. This requirement applies to EU members from 1st January 2022, so EU members can unfortunately no longer donate material.

Also, because the UK is no longer part of the EU, any packages sent to EU members would need to be accompanied by a Phytosanitary certificate. These are now also required for material sent to Australia. This would be a difficult and expensive administrative burden, and we regret that as a result **we are unable to send bulbs or seeds to EU or Australian members at this time**. We are still able to send seeds to some countries outside Europe, provided that the members receiving them are conversant with their own regulations.

Although UK gardening societies are lobbying the UK government to change the regulations to facilitate international seed exchange, the import requirements set by the EU are outside the control of the UK government, and are unlikely to be affected by any changes.

There is more information about our Exchanges at Bulb & Seed Exchange.
